NOW OFFERING IMPROVED ORAL CANCER SCREENINGS

Shine A Light, Save A Life

We are excited to announce improved technology allowing earlier oral cancer detection. Oral cancer is on the rise and striking earlier due to the following risk factors: HPV, alcohol, smoking, genetics, and more. OralID™ is an adjunctive screening device utilizing fluorescence technology to aid in visualizing oral abnormalities. Get screened today!

**Once yearly, 2
minute exam that
can SAVE your
life!**

**Early detection is
key. 70% of oral
cancers are found
in stages III-IV.**

**Billable to
insurance**

**9,700 deaths in
the US will be due
to late diagnosis
of oral cancer.**

***Option to opt out
of Oral ID Exam**
